Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-26 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 1, the phrase "such as" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention.

See MPEP § 2173.05(d).

Claims 12, 15, 17, and 23 recite the limitation "said projections" in line 6. There is insufficient antecedent basis for this limitation in the claims.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 1, 10, 11, and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Kiriya, US Patent 5,853,176.

Kiriya teaches a vacuum chamber that includes: a floor plate 30B; an upper plate 30A; a plurality of props 64A, 64B standing on the floor plate to support the upper plate; side plates 30C-30F; connected portions between the floor plate/upper plate and

the props fixed by screws 66; grooves 76 with housing spaces (figure 5) along the circumferential edge portions of the props and bottom and upper plates; and a gasket 62A, 62B for sealing the side surfaces and connecting portions. The side plates are fixed to the circumferential edge portions and sealed by the side sealing portions of the gasket. (Entire document)

Allowable Subject Matter

5. Claims 2-9, 12, 13, and 15-26 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

6. The following is a statement of reasons for the indication of allowable subject matter: the vacuum chamber as claimed in claim 2, specifically, the projections projecting along borderlines of the first connected portions and the second connected portions are formed respectively, and sealing grooves for engaging the projections are formed in the connection sealing portions of the gasket; and the vacuum chamber of claims 12, 15, 17, 19, 21, and 23 specifically the first connected portions and the second connected portions have housing grooves for the connection sealing portions of the gasket which are formed in an arc shape along said first and second connected portions, and the projections are formed so as to project into the housing grooves were not found in or suggested by the art.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited art teaches the technological background of the
